DECLARATION OF COMMERCIAL OWNERSHIP AND FIRST USE

Date: October 10, 2026

Entity: ZIVALIX DIGITAL SOLUTIONS™ (Software Engineering Agency)

Founder & Owner: Mayyar Zidane

I, **Mayyar Zidane**, acting as an independent founder doing business as (DBA) **ZIVALIX DIGITAL SOLUTIONS™**, hereby declare and formally assert exclusive commercial ownership and first-to-use rights over the "Zivalix" brand, its digital assets, proprietary source code, algorithms, and its associated intellectual property on a global scale.

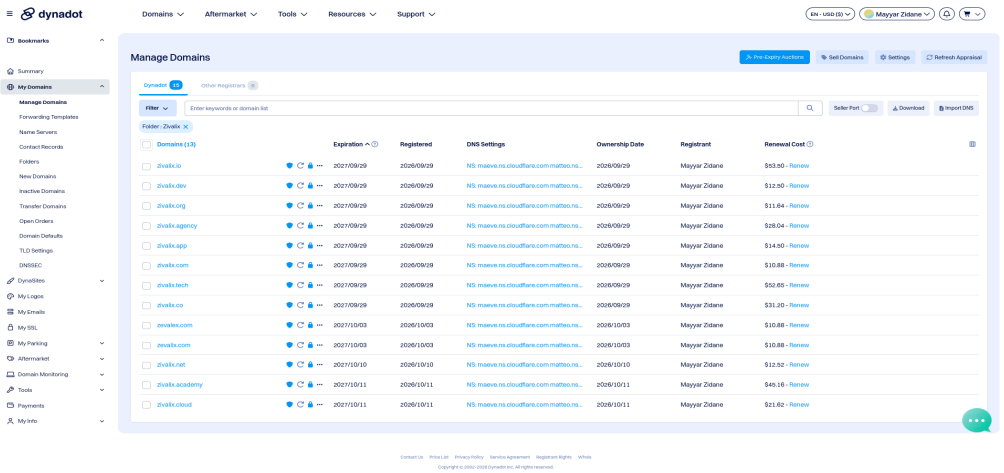

SCOPE OF BUSINESS & COMMERCIAL COVERAGE:

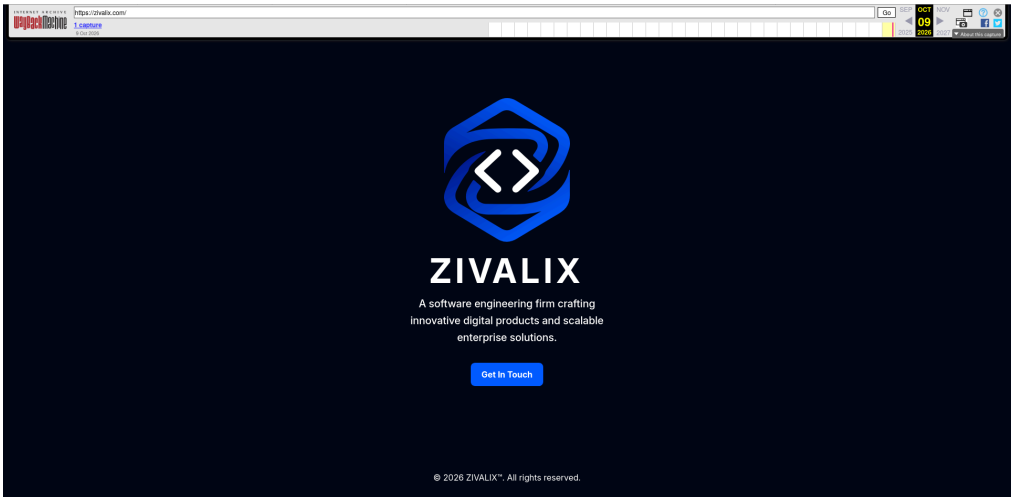

The **ZIVALIX™** and **ZIVALIX DIGITAL SOLUTIONS™** brand, trade name, and intellectual property are actively engaged in and claim absolute priority of use across a comprehensive umbrella of technology, digital, and B2B sectors. This commercial scope includes, but is not limited to:

- **Software, Engineering & Advanced Tech (Class 42 & 9):** Custom software development, mobile and web applications, SaaS, PaaS, AI solutions, machine learning models, cloud computing infrastructure, cybersecurity, Web3 technologies, blockchain infrastructure, smart contracts, Fintech solutions, Internet of Things (IoT), embedded systems, process automation (RPA), AR/VR, and interactive software development.
- **B2B Consulting, Design & Tech Agency Services (Class 35):** IT consulting, digital transformation strategy, digital marketing tech, UI/UX design, digital branding, enterprise architecture, business intelligence (BI), and e-commerce platform management.
- **Digital Infrastructure & Data (Class 38):** Cloud networks, web hosting, big data management, and digital platform facilitation.
- **Education, EdTech & Media (Class 41):** Technology training, software engineering bootcamps, digital courses, online academies, educational content creation, digital media production, podcasting, digital publishing, and interactive digital entertainment.

DIGITAL ANCHORAGE & COMPREHENSIVE DOMAIN PORTFOLIO:

The "Zivalix" brand identity is strictly tethered to a comprehensive portfolio of primary and defensive digital real estate. I, Mayyar Zidane, explicitly hold the administrative and legal ownership of a robust domain network. This includes the primary global hub **zivalix.com**, industry-specific extensions explicitly matching our commercial scope (e.g., **.tech, .dev, .agency, .academy, .cloud**), and phonetically similar defensive variations (e.g., **zevalex.com, zevalix.com**). This sweeping digital acquisition, registered securely under my name across global registrars (e.g., Dynadot), demonstrates premeditated intent to dominate this brand space and serves as immutable proof of absolute control. The active status, public deployment, and historical commercial usage of the primary domain have been immutably archived and independently verified via the Internet Archive (Wayback Machine) as of October 2026. Attached below are the official registrar records verifying this ownership portfolio.

DECENTRALIZED & BORDERLESS JURISDICTION:

As a provider of advanced software engineering, AI solutions, and cloud infrastructure, **ZIVALIX DIGITAL SOLUTIONS™** operates natively as a global, decentralized entity. Our commercial footprint transcends traditional geographical jurisdictions, establishing universal "Common Law" trademark rights internationally via the World Wide Web. We assert that our operational territory is the global digital economy.

CONSTRUCTIVE NOTICE & PREEMPTION OF BAD FAITH:

This cryptographically timestamped dossier, coupled with our publicly verifiable web presence, constitutes legally binding "Constructive Notice" to the global public and all market competitors. Any subsequent registration, imitation, or use of the **ZIVALIX™** name or its visual assets by any third party in adjacent sectors will be legally classified as an act of "Bad Faith" and willful infringement, strictly nullifying any defense of innocent or coincidental adoption.

Any attempt by a third party to register or use the "Zivalix" name, or any phonetically or visually similar variant, in the technology, software, digital services, education, or adjacent B2B industries constitutes a direct "Likelihood of Confusion" and a willful infringement on our established prior rights.

This dossier, including the original vectorized Zivalix visual identity and domain ownership proofs, is cryptographically timestamped. This serves as irrefutable digital evidence of prior art and first commercial use under common law trademark principles.

Core Brand Assets & Trade Dress

Usage: All documented visual marks, icons, lettermarks, and wordmarks may be used independently, interchangeably, or in any composite arrangement.
Colors: Base `#030A1E` | Gradient Spectrum: `#021C92`, `#0233B8`, `#0259F8` | Text `#0056F1` *(Inclusive of all shades, opacities, and gradient directions).*
